Manikanta Nandam

Senior iOS Developer

Hyderabad, India | +918121971462 | nanirocks125@gmail.com | https://github.com/manikantanandam

SUMMARY

Senior iOS Developer with 8+ years of experience shipping polished, scalable apps for global consumer brands including Bose and AOL. Expert in Swift, SwiftUI, UIKit and Combine, with deep experience in clean architecture (MVVM, VIPER), Bluetooth audio, real-time communication and offline-first apps. Leads features end to end, mentors developers and uses AI tools to ship faster.

SKILLS

Languages & Frameworks: Swift, Objective-C, SwiftUI, UIKit, Combine, RxSwift, Flutter, Dart
Architecture & Concurrency: MVC, MVP, MVVM, VIPER, Async-Await, GCD, Operation Queue, Memory Management, Data Structures
Storage, Security & Services: Core Data, Realm, Firebase, Push Notifications, WebRTC, Keychain, Obfuscation, File Manager
Tools & CI/CD: Xcode, VS Code, Git, Jira, Source Tree, SPM, CocoaPods, Bitrise, GitHub Actions, SonarCloud, Codecov, TestFlight, App Release, Logging

EXPERIENCE

Specialist Software Engineer, LTIMindtree, Hyderabad | Aug 2025 - Present

- Developed features for the AOL iOS app (Mail, News, Weather and Video) in Swift and SwiftUI for a global consumer audience.
- Partnered with backend teams on the GCP migration, keeping the app stable for users throughout the transition.

IT Analyst (C2 Grade), Tata Consultancy Services, Bangalore | Oct 2022 - Aug 2025

- Shipped features for the Bose Music app, which connects and controls Bose earbuds, headphones, speakers and soundbars.
- Engineered Bluetooth (CoreBluetooth) and WebSocket device flows in an MVVM-C, RxSwift codebase.

iOS Developer, Soverg Pvt. Ltd, Bangalore | Feb 2022 - Sep 2022

- Developed Sprouter, a social media management platform, in a fast-paced startup environment.
- Added offline storage with Realm and tuned app performance for a smoother experience.

Digital Assistant, Government of Andhra Pradesh, Andhra Pradesh | Nov 2019 - Feb 2022

- Served as nodal officer for all IT-related activities of the Grama Panchayat.
- Supported staff and citizens with government digital services and IT systems.

Software Engineer, Pratian Technologies, Bangalore | Sep 2017 - Sep 2019

- Progressed from entry-level developer to owning enterprise mobile apps end to end, from wireframes to App Store release.
- Delivered native iOS and hybrid apps for healthcare, compliance and performance-management clients.

SELECTED PROJECTS

AOL (America Online) | Swift, SwiftUI, GAM SDK

App to manage AOL Mail, read top news, check local weather and watch trending videos in one place.

- Built a tracking module for the mail details page, giving product teams engagement data.
- Partnered with backend teams on a smooth GCP migration with no disruption to users.
- Owned affiliate links and analytics integration, and resolved production bugs.

Bose Music App | CoreBluetooth, MVVM-C, RxSwift, WebSockets

Consumer app to connect and control Bose earbuds, speakers and soundbars.

- Created surround sound features for Bose earbuds.
- Engineered multi-speaker grouping with dynamic switching of the master device.
- Integrated the Alexa X app flow and resolved production issues.

Sprouter | MVP, Realm, Deep Linking

Social media aggregator to post to Facebook, Twitter, Instagram, YouTube and more from one place, with a unique profile of custom links and files.

- Launched Custom Links and Custom Files, the features behind every user's profile page.
- Introduced offline storage to the existing app and tuned performance.

GTComplyRite | VIPER, Realm, Firebase, GCD

Online/offline FSSAI compliance auditing app for food manufacturers, usable by auditors in remote areas.

- Designed wireframes and prototypes from scratch and set up the VIPER architecture.
- Profiled with Xcode Instruments to make the app noticeably more responsive.
- Enabled offline audits in remote areas with Realm storage and REST API sync.
- Mentored new joiners in Swift and iOS development.

CultureWerkz | Cordova, Ionic 3, SQLite

Hybrid app aligning individual objectives, key activities and key results with organization goals, flagging risks.

- Pioneered hybrid development as the organization's first hybrid app developer, building prototypes and integrating REST APIs.

KnockKnockDoc (KKD) | XMPP, WebRTC, Core Data, PushKit, CallKit

Real-time chat app for US healthcare providers with messaging, media sharing, and audio/video calls with end-to-end encryption.

- Designed audio and video call screens and implemented XMPP signaling with WebRTC calling.
- Prototyped end-to-end encryption using OMEMO (AES-256) as a proof of concept.

EDUCATION

B.Tech in Electronics and Communications Engineering (ECE), Gudlavalleru Engineering College | 2013 - 2017
